

1. Right mouse click on Solution and select Open Folder in file explorer

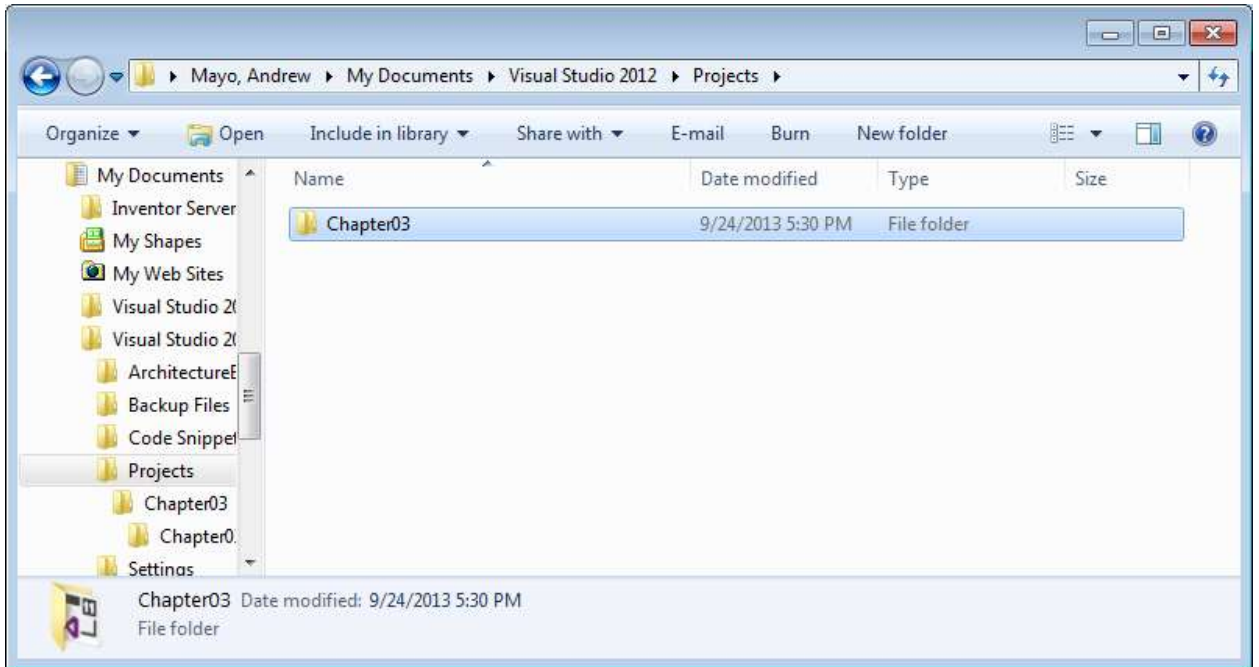

2. The windows explorer window will appear and be on the directory that your solution is located(this this example it is Chapter03):

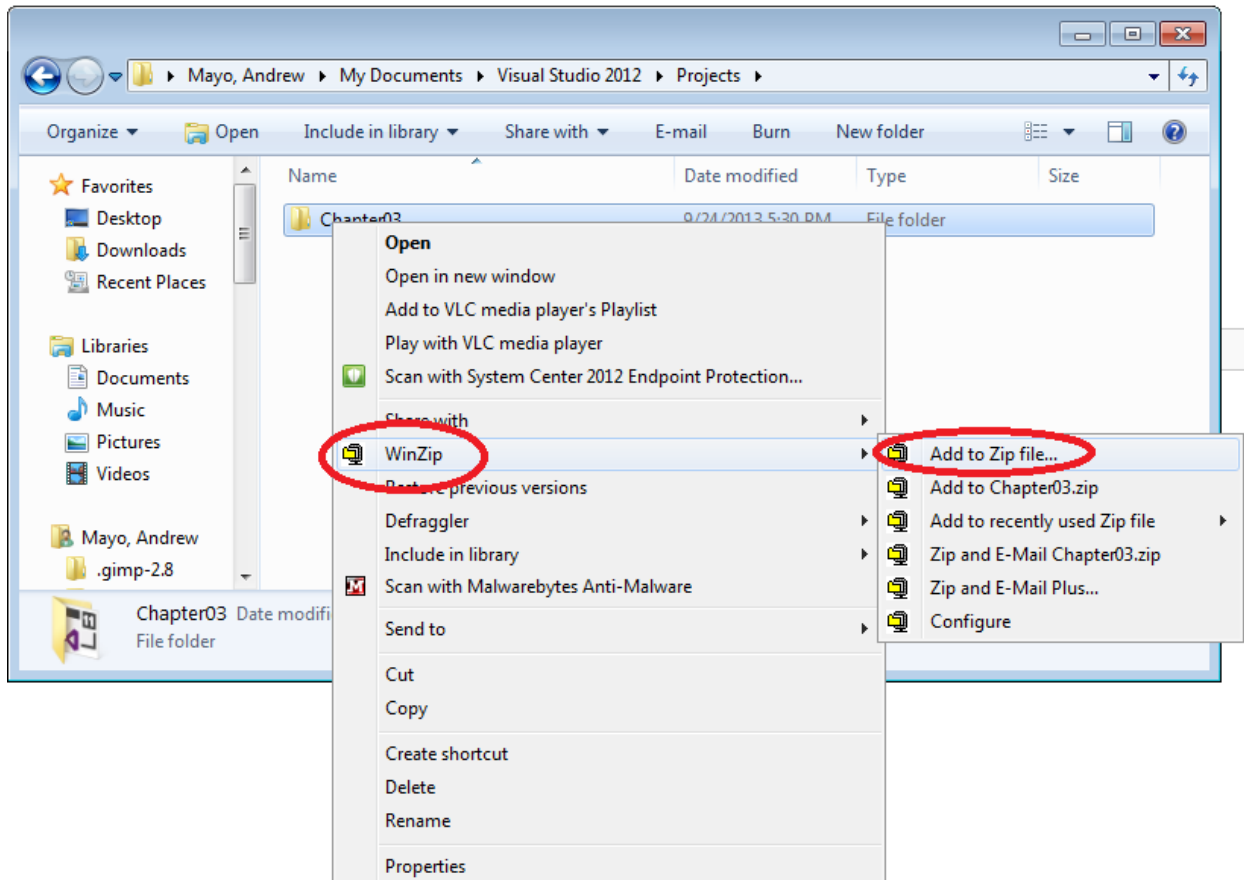

3. Go up 1 directory level(note that the directory is highlighted when the mouse is placed on it):

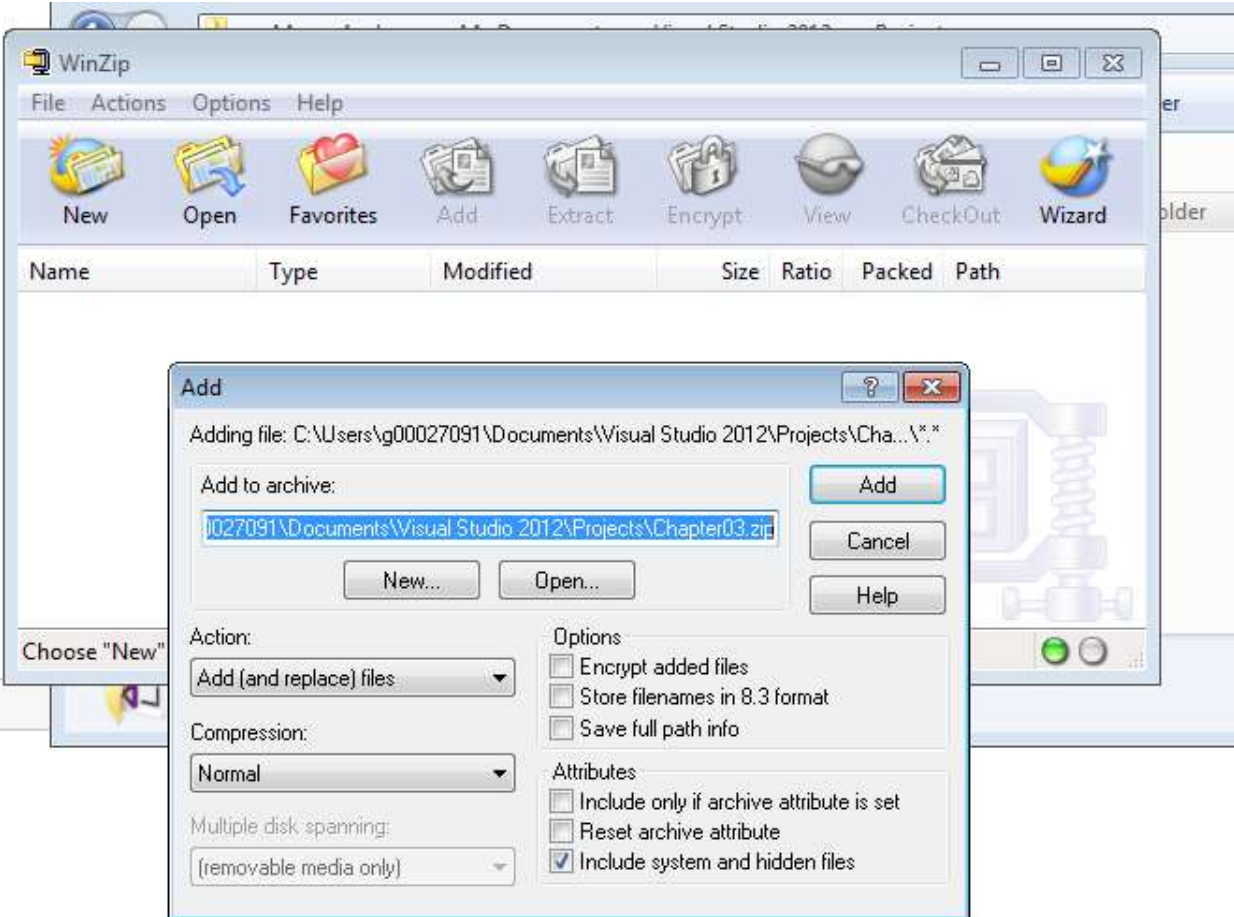

4. Click on that directory so that you are now positioned on it (the Chapter03 directory is the one that contains our Visual Studio Project and source code files):

5. Right mouse click on that directory and launch the WinZip(or any other installed zip utility):

6. The Zip utility will launch:

7. Click the add button and it will add the zip file to the current directory as shown(default name is the directory name):
